SCORPION HELMETS

SCORPION HELMETS

### INTRODUCTION

Congratulations for acquiring a premium Scorpion helmet. This helmet embodies the latest, state-of-the-art design, engineering and technology available in the market today and is an excellent investment for your comfort and protection.

**Please remember that no helmet can protect you against all possible or foreseeable impacts even when built with the latest and best materials and technology.**

The following information will help you to enjoy and properly care for your helmet.

WIND-TUNNEL TESTED

**FIBER-TECH MATRIX SHELL** Lightweight and tough.

### FUNCTION

A helmet's main function is to protect your head from impact in case of an accident. To accomplish this, a helmet surrounds your head with a matrix of materials designed to absorb and cushion impact energy. A helmet is also designed to provide you with comfort while riding at speed and in various weather conditions. Yet, there is a trade-off: A helmet decreases hearing sensitivity, peripheral vision and physical movement to a certain extent while providing protection and comfort.

### FIT

It is important for maximum safety that your Scorpion helmet fit snugly and comfortably on your head with the retention strap (chinstrap) properly fastened. If the helmet moves side-to-side or forward and backward without pulling the facial skin and scalp, it is too large. If the helmet is constricting or painful, it is too small.

### VENTILATION SYSTEMS

Ventilation systems are designed and engineered to maximize your comfort in a wide range of temperatures. Familiarize yourself with the vents on your helmet. Your helmet ventilation systems should be kept clear of any obstructions including dirt, insects or other items which could interfere with proper flow of air. The ventilation systems play an important role, especially during physical exertion or hot-weather riding.

### SECURING AND WEARING YOUR HELMET

Do not simply pull your helmet down onto your head like a hat. Your Scorpion helmet should be worn as follows: Using both hands, grab the helmet's bottom rim while holding the chin straps with your thumbs, then "roll" the helmet onto your head starting at the forehead. Continue rolling the helmet on toward the back of the head until it comes to rest with your head fully in contact with the inner linings and cheek pads. Finally, **FIRMLY AND SECURELY FASTEN YOUR CHINSTRAP.** Check your chinstrap for tightness occasionally as vibration or wind may loosen it.

### CLEANING YOUR SCORPION HELMET SYSTEM

None of the components of your Scorpion helmet can be damaged by water. All headliners and sweat-wicking cheek pads are machine washable. Wash them with a mild detergent in warm water and allow to air dry. Hand washing is recommended, but machine washing is also permitted. Use the "delicate" cycle to prevent the agitator from damaging the sweat-wicking material covering the liner parts. Do not place lining parts in the dryer: Excess heat may damage the foam and coverings.

The shell of your helmet should be cleaned using only a mild detergent and water. **NEVER USE PETROLEUM BASED CHEMICALS, SOLVENTS, GASOLINE, CLEANING AGENTS OR ADHESIVES** to clean the shell, liners or faceshield of your helmet. Your helmet shell and liner may be seriously damaged by the use of such products. A coat of automotive wax over the outer shell will provide added shine and a protective layer for the finish.

### DONT'S

- DON'T** ride without fastening your chinstrap.
- DON'T** clean your helmet with petroleum products, solvents, benzene, thinner or cleaning agents.
- DON'T** paint over your helmet's finish without totally protecting and isolating the shock-absorbing liner and plastic parts. Your warranty will otherwise be invalidated.
- DON'T** use paint which requires heat curing.
- DON'T** drop your helmet from any height onto a hard surface. This could cause damage to your helmet's finish and/or decrease its ability to protect you.
- DON'T** place your helmet on your motorcycle's rearview mirror: The sharp pressure from the mirror's edge will compress and damage the helmet's shock-absorbing liner.
- DON'T** place your helmet on the motorcycle's seat or fuel tank. It can easily roll off and hit the ground causing damage to the helmet. It is best to place your helmet on the ground so it cannot fall in any direction.
- DON'T** modify any part of your helmet, e.g., drilling the shell or cutting and pressing the shock absorbing liner. Installation of sound systems, speakers and microphones reduces your helmet's ability to protect you and is not recommended.
- DON'T** use the helmet again if it has either been dropped or involved in an accident. Replace it even if damage is not visible to the naked eye.
- DON'T** place your headliners and cheek pads in the dryer after washing. Allow them to air dry.
- DON'T** attempt to remove, change or replace your goggles while riding your motorcycle or ATV.

### WARRANTY

For on-line registration of your new Scorpion helmet, please log onto [www.scorpionusa.com](http://www.scorpionusa.com) and click on "Warranty Registration." Should you have a warranty claim, please call 888-672-6774 during business hours (Pacific Standard Time) and ask for the warranty department. You may also take your helmet to your local dealer for evaluation. For minor cosmetic defects, the dealer may be able to help you with an assortment of spare parts or accessories. Spare parts and accessories are also available directly from Scorpion on our website if your dealer not have the ones you need.
